-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 2, 8-18, 20, 22, 24 and 26, drawn to handover, classified in class 455, subclass 439.
- II. Claims 3-7, 19, 21, 23, 25 and 27 drawn to handover, classified in class 455, subclass 4367.
- III. Claims 1, 28-30, drawn to error correction, classified in class 375, subclass 240.27.
- IV. Claim 31, drawn to a transmitter with turbo encoding , classified in class 375, subclass 295.
- V. Claim 32, drawn to a receiver with turbo decoding, classified in class 375, subclass 316.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because error correction in the downlink (inv. I) may

not require error correction in the uplink (inv. II) and vice versa. Furthermore, error correction can be applied to wired networks and when it is applied to wireless networks, can be used utilized in transmitters and/or receivers that are not in handover. The subcombination has separate utility such as encoding and decoding digital signals that are not necessarily being utilized in a wireless network or being used in handover. **Note: the preambles in claims 1 and 28-32 are considered as intended use since they are not used to enhance the body of the claim.**

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
